

Extreme Poverty - Disease - Malaise in Uganda. These children desperately need your help.

Imagine that you have just returned to your village. You are only 12 years old. You were taken away by force to be a child soldier. You have experienced the most terrible atrocities. While you were away, it appears that the society of your village has crumbled into total despair and the world has abandoned you. All around there are children suffering from infected wounds, open sores, worms, malaria, dysentery and malnutrition. There are few doctors and the government has stopped paying any nurses' salaries.

September 4 – 30, 2010

**Medical Mission Trip
to Relieve the
Suffering**

**The North Uganda
Medical Mission Team**

The Mission

Some wonderful people are committed to bring medications, medical training and support to Pader, Northern Uganda. There is a great need for Nurses to teach these mothers about nutrition and the necessities of health and sanitization. Even some short, wise words on disease prevention would greatly benefit these families. All of this in addition to basic treatment and check-ups. We need to establish a Medical Clinic.

May Tao RN, BScN

May has been an effective member of the Health Cabinet at Bayview Glen Church for several years. Her background as a Public Health Nurse and her education as a Parish Nurse gives her a unique blend of spiritual & practical experience to offer this project. Her flexibility, enthusiasm and commitment and her ability to work with diverse populations, especially youth is a particular strength.

Kenneth Liew, MD, FRCPC (Paed)

Consultant Pediatrician, Allergist and Clinical Immunologist. Previous medical work locations include Thunder Bay Health Sciences Centre, Sioux Lookout, Mulago Hospital, Kampala, Uganda and McMaster Children's Hospital, Hamilton, ON. His interest lie in Allergy, International/ Tropical Medicine. Private practice offices in Woodbridge, and Toronto.

Curtis Legiehn, BSW

A Ryerson Graduate, specialized in international relations, he recently returned from 5 months in Pader, Northern Uganda working with former child soldiers in the field of education. Teaching the importance of staying in school, implementing abstinence programs to curb the deadly HIV/AIDS virus, organizing soccer tournaments among former soldiers to bring peace to the youth of Pader.

Our long term goal is to establish a permanent medical facility partially staffed by locally trained nurses and supported by regular visits by Canadian Doctors and Surgeons.
