

SYNTHETIC LUBRICANTS CROSS-REFERENCE GUIDE

This Summit Products Guide deals with approximate competitive products comparison and is not intended to be a guideline for making lubricants recommendations. It is important to know the actual application and correct Summit products for that application to make the proper recommendation. If there is a question about the proper lubricant to be used in a specific application, you should contact Summit's technical staff to avoid costly mistakes caused by improper lubrication of equipment. Note on each sheet that these comparisons are only approximate since no two products are formulated exactly the same, and these comparisons are based on our judgment of the usage and description of the product as printed in competitive advertising literature.

Note: It is always best to know the actual product application in the specific piece of equipment that is being lubricated before cross-referencing to Summit.

SH® , DSL® , SUPRA COOLANT®, AND SUMMIT®
are Registered Trademarks of Summit Industrial Products, Inc.
