This Summit Products Guide deals with approximate competitive products comparison and is not intended to be a guideline for making lubricants recommendations. It is important to know the actual application and correct Summit products for that application to make the proper recommendation. If you have questions about proper lubricants you should contact our lubricant advisor at CompreVac.

Note on each sheet that these comparisons are only approximate since no two products are formulated exactly the same, and these comparisons are based on our judgment of the usage and description of the product as printed in competitive advertising literature.
